

Dear Kevin,

Thank you for the opportunity to provide you and the City of Seabrook pricing for Meador Park. After reviewing the project and talking to you about light requirements, we recommend:

17 metal solar pole assemblies (pole, battery box, batteries, solar panels, batteries and controller) spaced 150' apart with Seventeen 30w LED fixtures

Our solar Led fixtures are tested and rated at 254,000 hours of operating time for years of low cost lighting for the park.

The price includes installation of the 17 solar units.

I would be happy to get together and further discuss the quote with you at your convenience.

Sincerely,

Ken Hutchinson
