

Robinson Park

SEABROOK

Our parks and wetland on and along the coast are important feeding and breeding areas for several species of birds.

Common birds along the Texas Coastal Birding Trail include owls, vultures, spoonbills and herons.

Please enjoy local birds from a distance and never allow children or pets to scatter a flock.

Can you spot these birds in our wetland?

American Kestrel

Cedar Waxwing

Black Vulture

Great Horned Owl

Northern Cardinal

Red-bellied Woodpecker

Roseate Spoonbill

White Ibis

Yellow-crowned night heron
