

## NATIONAL CYBERSECURITY MONTH OCTOBER 2020

**WHEREAS**, the City of Seabrook understands it has a vital role in identifying, protecting its citizens from, and responding to cybersecurity threats that may have significant impacts to our individual and collective security and privacy; and

**WHEREAS**, critical infrastructure sectors are increasingly reliant on information systems and technology to support financial services, energy, telecommunications, transportations, utilities, health care, and emergency response systems; and

**WHEREAS**, cybersecurity education and awareness is crucial for everyone, including large corporations, small businesses, financial institutions, schools, government agencies, the home user, and anyone who connects to the internet; and

**WHEREAS**, monitoring your accounts, being conscientious of what you share online, keeping computer software up to date, creating unique passwords and changing them regularly, installing anti-virus programs and firewalls, and using mobile devices safely are ways you can protect yourself from phishing, viruses, malware, and loss of sensitive data; and

**WHEREAS**, maintaining the security of cyberspace is a shared responsibility in which each of us has a critical role to play, and awareness of computer security essentials will improve the security of Seabrook's information, infrastructure, and economy; and

**WHEREAS**, Seabrook is proud to join a coalition of private companies, nonprofits and government organizations to raise awareness about cybersecurity among all technology users, helping them to stay safer and more secure online.

**NOW, THEREFORE**, I, Thomas G. Kolupski, Mayor of the City of Seabrook, on behalf of the City Council and City staff, do hereby recognize the month of October as *National Cybersecurity Month* in the City of Seabrook.

*Thomas G. Kolupski*
