The Leader In Me program is good for our school because it helps our student body stay organized and focus on learning, and to be good to each other. What this program means to me is to motivate me to have fun learning, being a kind person, and walking along the seven habits. It's good for the community because the students are learning to be kind in and outside of schools, and not just to friends and family, but to Seabrook! Some leadership roles I have and had are robotics, and safety patrol. In robotics, you need to show up on time, be kind to your partners, be patient, and work with others. In safety patrol, you get chosen by showing the five core values. When you do get in, you have to show up on time every day, and you have to set an example for the younger students.

The Leader In Me program is a special event that allows the school to come together as one and express ourselves in many different ways.

For example, we have clubs here at Bay who do fun activities after school. We have Robotics, Eaglets Dance team, Student Council, Gardening Club and many others. We also have a Safety Patrol team that helps students with getting to school and going home. These groups really just focus on the core values such as responsibility, caring, fairness, trustworthiness, kindness, and others. It also helps out on having fun, doing what you love, finding new interests, and making new friends. Bay Clubs are a really special and fun thing we get to show in the Leader In Me Program.

Another thing I love about the Leader In Me Program is that we get to share our goals and WIGs with our Seabrook Community. Adults and sponsors in our community can come together and talk about our goals, the 7 Habits and the Core Values.

The Leader In Me program is a really fun and special event where kids can express themselves, share goals, WIGS, and show how they can be a leader in and out of school. It's an event where the community can get together at school and talk about how anyone can be leaders anywhere. ★
