

## Scope of Work in Seabrook

INEOS will be installing a new 12" pipeline between INEOS' existing valve sites in Kemah and Seabrook. The new line will be installed via Horizontal Directional Drilling (HDD) and open cutting a short distance from the end of the drill to the valve site.

- In Seabrook, there will be temporary workspace in the CenterPoint ROW (red area below) that will be matted and used for setting the drilling rig.
- Truck and equipment entry will be via the old Majestic Pet Hotel off Nasa Rd. 1. (see yellow arrow)
- The Traffic Control Plan will include flaggers on Nasa Rd. 1 when all major equipment enters or exits the job site.

Schedule (not based on inclement weather):

- Mobilization on the Seabrook side of this project is expected to occur the week of 8/19/2019.
- The drilling rig is expected to be set the week of 9/3/19.
- All activities are expected to complete by the end of October 2019.

## Scope of Work in Seabrook

Area that will be open cut to connect end of HDD to existing valve station (blue – in CenterPoint ROW).
